

AHMAD SHAMOUKA

Full-Stack Software Engineer — Laravel · React · Node.js

shamoukaahmad@gmail.com | +961 70 938 737 | [LinkedIn](#) | [GitHub](#)

Lebanon | Open to Remote, Hybrid & Relocation

SUMMARY

Full-stack software engineer with 3+ years building and running production systems end to end. Currently the sole developer behind a multi-module Laravel ERP and FlashMed SPARK, a multi-tenant DICOM/PACS platform — database design, Node.js and Python backends, React viewers, and deployment. Shipped an in-viewer AI assistant that drafts radiology findings from the study, retrieves visually similar prior cases, and compares the doctor's report with those cases before sign-off. B.Sc. Computer Science; English C1.

CORE TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, Python, REST APIs, service architecture, events/listeners, queues, policies/gates, RBAC, webhooks

Frontend: JavaScript (ES6+), TypeScript, React, Livewire, Alpine.js, Blade, Tailwind CSS, Bootstrap, DataTables, Chart.js

Databases: MySQL (indexing, query optimization, N+1 elimination, reporting), PostgreSQL, MongoDB, migrations, schema design

Real-Time & Integrations: Pusher/WebSockets, WhatsApp Business API, OpenAI/GPT APIs, Gemini vision, third-party API integration

Domain: DICOM/PACS (Cornerstone3D, Orthanc), medical image embeddings (MedImageInsight/BiomedCLIP), ERP & POS systems, PDF/Excel reporting

Tools & Delivery: Git, Docker, AWS, Linux, Nginx, Composer, Vite, Postman, CI/CD, production debugging

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer — FlashMed | Tyre, Lebanon | Mar 2023 – Present

Sole full-stack owner of a production medical-equipment ERP and the FlashMed SPARK imaging platform

- Own end-to-end delivery of a multi-module Laravel ERP covering sales/POS, accounting, HR, CRM, inventory, repair management and approval workflows — from schema and service design through UI, reporting and release.
- Built **FlashMed SPARK — Medical Imaging Platform** (React, Node.js, Python, Cornerstone3D, Orthanc, Gemini/OpenAI): production DICOM/PACS platform with Orthanc ingest, Cornerstone3D viewer, radiology reporting with voice dictation, and an in-viewer AI assistant that drafts findings from the image and similar prior cases.
- Extended SPARK with owner, imaging-centre and radiologist portals, local-to-cloud Orthanc forwarding, unlinked-study linking, shareable viewer sessions, image-grounded chat, and report-compare against similar finalized cases before sign-off.
- Delivered an in-ERP AI assistant on the OpenAI API for natural-language sales, inventory and accounting questions, using prompt classification and schema-aware, parameterized query generation to keep execution safe.
- Reduced load times on heavy stock, sales and payment reports by eliminating N+1 queries, adding targeted indexes, caching and server-side DataTables pagination.
- Implemented real-time approvals and role-aware notifications with Pusher/WebSockets, Laravel queues and events, plus WhatsApp Business API messaging for customer and operations updates.
- Run production operations single-handedly: Git workflow, migrations, environment configuration, logging, backups, deployments and live incident troubleshooting.

Web Developer — Trusto Tech | Saida, Lebanon | Sep 2022 – Jan 2023

- Refactored internal sales-management backends — structure, forms and business workflows — improving maintainability of live code without disrupting daily operations.
- Integrated third-party APIs and improved responsive behaviour and usability across existing production web interfaces.

Coding Instructor (Part-Time, Remote) — BrightChamps | Lebanon | Aug 2022 – Sep 2023

- Taught web development and programming fundamentals to 60+ students through project-based remote sessions, alongside full-time development work.

SELECTED PROJECTS

Loyalty Rewards Application — Laravel 10, Livewire 3, Alpine.js, Tailwind CSS

Invoice-based QR codes with automatic point calculation, balance tracking and reward redemption; Laravel Breeze auth and Vite asset pipeline. github.com/AhmadShamouka/loyalty-reward-app

The Brand Fantasticator — Astro, TypeScript, SEO, performance

Responsive web platform with structured data/schema markup, caching and page-speed optimization.

thebrandfantasticator.com

MConceptCo — Corporate Website — WordPress, technical SEO, performance

Responsive corporate site with frontend usability, loading-speed and search-visibility improvements through to production deployment. mconceptco.com

UnrealFit — AR Virtual Wardrobe — Laravel, React, Python, Flask

Full-stack augmented-reality wardrobe with user/admin dashboards and virtual try-on, integrating Laravel with a Python/Flask AR service over REST. github.com/AhmadShamouka/unreal

EDUCATION

B.Sc. Computer Science — Lebanese International University (LIU), Beirut | 2019 – 2023

Full-Stack Web Development Bootcamp — SE Factory, Beirut | 2023 – 2024

LANGUAGES

Arabic — Native | English — C1, professional working proficiency | German — A1
